Do you need a Form 214 filled out? If so is that available somewhere for download? Here is what I received from Kuda.

Tim,

Can we share our image services to USGS and USDA for their mapping products? Glenn Bethel and Brenda Jones hit me up. I am guessing they would like it for the backdrop imagery.

Kuda or I are happy to go through the proper channels, just need some direction on what that is.

Thanks,

Tim Richards

Its R6 managements call. So I can put it in the proper context for them have these agencies identified an operational need for this data or is at his general interest request?

Joe and Eric,

This request came across from USGS and USDA. Is it ok to provide them access to the ASPECT Flight images from our AGOL site?

Joe,

When you have time, please give me a call about a request for USDA and USGS for access to ASPECT Imagery services. Also I wanted to let you know that our new contract includes a subcontractor (Woolpert) that is a true remote sensing company with airborne (manned and unmanned) capabilities. They have already stood up Harvey imagery with full public access as a general contribution to the response effort. This is something they did on their own without any government or private customer direction. I can get you a summary of their capabilities and costs if you would like it.
